# REPORT OF THE COMMISSION ON THE CITY OF NEW YORK

THE COMMISSION ON THE CITY OF NEW YORK, created by Chapter 100 of the Laws of 1993, has the honor to submit to you this report. The Commission was organized on January 1, 1994, and has since that time been engaged in a comprehensive study of the City's government, its structure, its functions, and its performance. This report is the result of that study. It contains a detailed analysis of the City's current government, identifies the strengths and weaknesses of that government, and proposes a series of reforms designed to improve the City's government and to make it more effective, more efficient, and more accountable to the people of the City. The reforms proposed in this report are designed to be implemented over a period of several years. They include a reorganization of the City's executive branch, a restructuring of the City's legislative branch, and a series of reforms designed to improve the City's judicial branch, its public safety, its education, its health care, and its social services. The Commission believes that these reforms are essential for the City to be able to meet the challenges of the future and to provide the highest quality of government to its citizens. We urge you to support these reforms and to take the necessary steps to implement them as soon as possible.
